WHAT IS STUDYMBBS

StudyMBBS for undergraduate medical education

StudyMBBS is StudyMEDIC's dedicated undergraduate platform, built around MBBS university examinations across all four professional years. Its topic-based learning also builds a foundation for NEET PG and FMGE.

2,500+
topics mapped across all four MBBS professional years

77,000+
learning assets in the app

50,000+
MCQs in six modes

14+
content types in one consistent framework

THE LEARNING JOURNEY

Every topic moves from first reading to exam-day mastery

1 Read

Interactive Smart Notes, two-page short notes and one-page Wisdom Pearls. Each Smart Note carries competency codes, weightage, must-know stars and an exam blueprint, with recall games and a viva-style quiz being built in.

2 Recall

Interactive flashcards in 5+ formats and short audio podcasts of about two minutes, each reinforcing one concept and linked to the note it belongs to.

3 Apply

MCQs in six modes, SAQ and LAQ answer guides, previous-year questions mapped to topic and university, and clinical reasoning sets.

4 Master

Animated 3D concept videos, mentor capsule videos and high-yield revision decks that draw a whole module together.

One framework, every topic

A consistent content framework supports each of the 2,500+ topics across the curriculum, so a student learns, revises and tests the same way from first prof to final prof.

WHAT THE SUBSCRIPTION INCLUDES

All four professional years

One subscription covers first prof to final prof, with every topic in the same learning framework.

Mobile app

Learn on the StudyMEDIC mobile app, with question banks, flashcards and progress tracking in one place.

A foundation for NEET PG and FMGE

Topic-based learning that carries into postgraduate entrance and screening preparation after MBBS.

CONTENT VOLUME

A complete MBBS learning library

Fourteen content types, 77,000+ learning assets, one consistent structure across every topic.

LEARNING AND RECALL

Long Notes	1,300+
Short Notes	1,300+
Short Podcasts	1,300+
Flashcards	9,000+
Wisdom Pearls	230
Mentor Capsule Videos	140
Animated Videos	1,300+

ASSESSMENT AND REVISION

PYQ – LAQ	650+
PYQ – SAQ	2,500+
PYQ – SAQ 2 Mark	2,200+
LAQ guides	1,600+
SAQ guides	5,800+
MCQ	50,000+
High Yield PPTs	75

50,000+ MCQS IN SIX MODES

39,000 factual and clinical questions, plus 10,000+ image, audio, video and spotter questions. Each carries the microtopic, CBME competency code, difficulty level, a detailed explanation and analysis of every distractor.

Image-based · Factual · Clinical · Audio-based · Video-based · Spotters

WRITTEN ANSWERS, MODELLED

Over 12,000 university-pattern SAQ, LAQ and past-paper answer guides. Each decodes the question, splits the marks, suggests the writing time and ends with the examiner's mark scheme for self-assessment.

10-mark LAQ guides · 5- and 3-mark SAQ guides · Year-wise PYQs

INSIDE A SMART NOTE

- Note ID, CBME competency codes, weightage and lesson coverage
- A how-to-use guide that breaks the note into sections of about 90 seconds
- A three-star system: must know, important and good to know
- An exam blueprint linking competencies to yield and question types
- Applied anatomy, rapid revision and likely-question sections

FLASHCARDS IN 5+ FORMATS

Image-based · Factual · Clinical · Audio-based · Video-based

- Two answer panels, highlighted terms and a memory hook on every card
- Clinical cards add what the house officer does next
- Common-trap boxes support spotter and viva preparation
- CBME-linked prompts connect recall with expected competence

STUDYMBBS DIFFERENTIATORS

Why StudyMBBS?

Four-year MBBS preparation with connected learning, exam guidance and clinical application, built for the university examination first.

CURRICULUM AND INTEGRATED LEARNING

1 Four-year MBBS ecosystem

Learning across all four MBBS professional years, connected to StudyMEDIC's wider career ecosystem of post-MBBS fellowships, NEET PG, FMGE, licensing and Royal College preparation.

2 CBME mapping for every topic

Competency codes link each topic and its assessments to expected learning outcomes, so a student always knows what a topic is for.

3 Dedicated AETCOM content

Attitude, Ethics and Communication content supports the professional skills every MBBS student is assessed on, mapped to NMC competencies.

4 Interactive multimedia notes

Audio, illustrations, embedded animations and assessments support active learning within the notes themselves.

EXAMINATION AND PRACTICAL PREPARATION

5 Detailed LAQ, SAQ and PYQ guidance

Concepts, exam blueprints, marks distribution and examiner expectations, with model answers for every question type.

6 University-specific preparation

AR, MR and CBS patterns, including Kerala University formats, and structured written answers for each.

7 Spotters and viva flashcards

Identification tasks, clinical prompts and viva-style flashcards support practical examination preparation.

8 Six MCQ modes

Factual, clinical, image, audio, video and spotters, with explanations and distractor analysis for every question.

Built for the university examination first

Everything in StudyMBBS points at the paper a student will actually sit: the question formats, the marks, the timing and the examiner's expectations.

INSIDE A SMART NOTE

Smart Notes, moving to an interactive format

The same Smart Notes, with a study plan, recall games, a clinical case and a viva-style quiz being built into every topic.

Timed sections
Short sections to finish between classes, with a study plan showing each part's time.

Must-know stars
Three-star ratings mark what must be known, what is important and what is good to know.

Exam blueprint
Each note links its competencies to yield and the question types they are usually asked in.

Examiner's scheme
LAQ and SAQ guides end with the mark scheme, so students can self-assess.

Exam-style answers
LAQ, SAQ, short-note, MCQ and viva prompts inside the note itself.

Recall games
Quick games on the note: True or Trap, Match It, memory match and rapid fire.

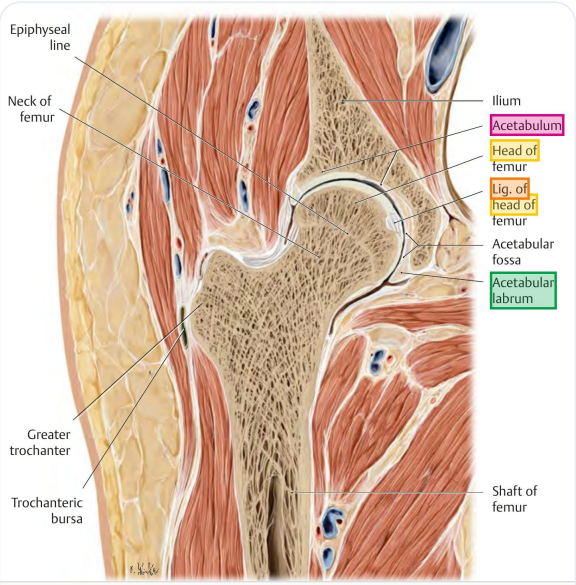

A clinical case
A patient case to reason through step by step before the quiz.

Viva-style quiz
Rapid questions asked the way a viva examiner would, with feedback on your reasoning.

SAMPLE LEARNING EXPERIENCE

One topic, connected learning

Hip Joint interactive note N035, CBME competencies AN17.1 to AN17.3, as a student meets it in the app.

- **Femoral head**
- **Acetabulum**
- **Acetabular labrum** — deepens the socket.
- **Ligament of the head (ligamentum teres)** — carries the foveal artery.

Labelled illustration from the Hip Joint note

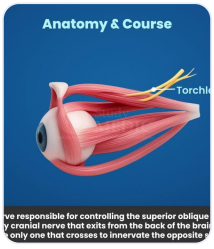

WHAT EVERY SMART NOTE CARRIES

- Note ID N035 and CBME codes AN17.1 to AN17.3
- Weightage and lesson coverage
- Three-star rating for must-know points
- Exam blueprint: yield and question types
- Applied anatomy and rapid revision
- Likely questions with model answers

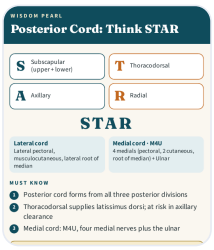

1 Read with context

Competency-linked sections combine explanations, labelled figures and applied anatomy. A star system marks must-know, important and good-to-know points.

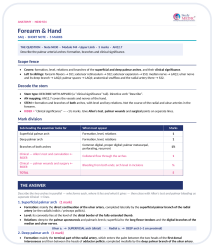

2 Explore the concept

Labelled illustrations, zoomable figures and embedded animations explain structures and movements inside the note.

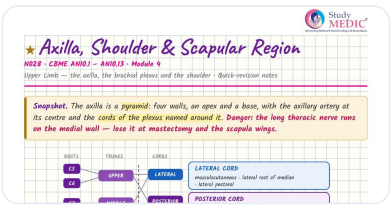

3 Recall actively

A two-minute podcast, interactive flashcards, rapid-revision summaries and examination-style questions on the same topic.

4 Prepare for the examination

Likely LAQ, SAQ and short-note questions connect topic learning with written preparation, each with a model answer.

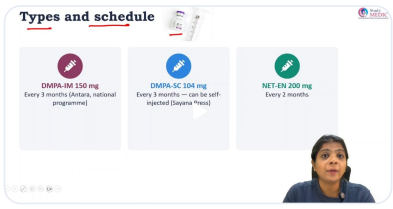

Wisdom Bytes

Two-page revision notes in a handwritten notebook style, for last-week and last-night preparation.

Wisdom Pearls

One-page memory hooks with must-know points, exam pearls and exam traps, for recall in under a minute.

Mentor capsules

Short mentor-led video lessons that connect topic knowledge with clinical understanding and exam technique.

ASSESSMENT · UNIVERSITY EXAMS

Built for your university examination

Practice in university-specific question formats, previous-year mapping and structured answer writing, with the AETCOM module every MBBS student is assessed on.

EXAMPLE · KERALA UNIVERSITY QUESTION FORMATS

AR

Assertion–Reason

Two linked statements: the student judges each one and whether the reason explains the assertion.

MR

Multiple Response

More than one option can be correct, and the student must select every correct answer.

CBS

Case-Based Scenario

A clinical case followed by linked questions that test application, not recall alone.

PREVIOUS-YEAR MAPPING

Past-paper questions from KUHS, MGR, AIIMS and RGUHS are linked to topics, competencies, universities and years. Every PYQ guide carries the note code, module, CBME code, paper years and a yield rating.

- 5,500+ past-paper questions
- Long, short and 2-mark

STRUCTURED ANSWER WRITING

1. **Interpret the question**
   Identify each directive and the applied component before writing.
2. **Plan the answer**
   Use the suggested mark split and a 15-minute plan for a 10-mark question.
3. **Write and self-assess**
   Follow the answer structure, diagram guidance and the examiner's scheme.

AETCOM MODULE · PROFESSIONAL SKILLS

Dedicated content for the NMC AETCOM module, mapped to NMC competencies and sitting alongside every other topic in the same StudyMBBS system.

A **Attitude**

Professionalism, empathy and the doctor's responsibility to patients and society.

E **Ethics**

Ethical principles, consent, confidentiality and sound decision-making in practice.

C **Communication**

Communicating clearly with patients, families and colleagues across clinical situations.

STUDYMEDIC CAREER PATHWAYS

From MBBS to a global medical career

StudyMBBS is the undergraduate foundation. The wider StudyMEDIC ecosystem carries the same student through post-MBBS fellowships, postgraduate entrance, international licensing and Royal College qualifications.

1

UNDERGRADUATE

StudyMBBS NEW

All four MBBS professional years: curriculum learning and university examination preparation.

MBBS · 14+ content types

2

POST-MBBS FELLOWSHIPS

StudyMEDIC Fellowships NEW

One-year post-MBBS fellowships: online, with an optional three-month hybrid clinical rotation. CPD-accredited, rolling quarterly intake.

OBG · Emergency Medicine · Radiology · General Surgery · Orthopaedics · Paediatrics · Reproductive Medicine · Psychiatry

3

PG ENTRANCE AND SCREENING

StudyNEET PG and StudyFMGE NEW

Topic-based undergraduate learning builds the foundation for postgraduate entrance and the FMGE screening examination.

NEET PG · FMGE

4

INTERNATIONAL LICENSING

Global licensing pathways

Preparation for medical licensing and registration in the UK, the United States and Australia.

PLAB / UKMLA · USMLE · AMC

5

SUPER-SPECIALTY ENTRANCE

Super-specialty preparation

Focused preparation for super-specialty entrance examinations after postgraduate training.

NEET SS · INI-SS

6

INTERNATIONAL PG QUALIFICATIONS

Royal College qualifications

Memberships, fellowships and clinical training programmes with StudyMEDIC's course directors.

MRCOG · MRCP · MRCPI · MRCS · MRCPCH · MRCEM · MRCPsych · FRCR · FRCPath

Part of the StudyMEDIC ecosystem

Operating since 2016 with offices in Qatar, India, Uganda, Mauritius and Australia. 400+ mentors, 200+ hospital partners, 1 million+ professionals trained. Wider programmes are separate offerings and are not included in the StudyMBBS subscription.
